

1 ~~12~~. (Amended) A method for storing, handling and transporting a roll of a paper machine, board machine, or finishing machine, the method comprising:

providing a moveable base for the roll, said moveable base being made into a roll box;

controlling the temperature and humidity conditions inside of the roll box to obtain desired temperature and humidity conditions suitable for the roll; and

maintaining the temperature and humidity conditions inside the roll box.

2 ~~13~~. (Amended) A method according to Claim ~~12~~¹, further comprising the step of providing the roll box with wheels.

11 ~~14~~. (Amended) A roll box according to Claim ~~14~~⁴, characterized in that the roll box includes equipment for identifying, positioning, and/or servicing the roll.

3 ~~23~~. (New) A method according to Claim ~~12~~¹, further comprising the step of providing equipment for identifying, positioning, and/or servicing the roll.
